PROFESSIONAL SUMMARY

Fresher – Actively seeking Full-Time Role

Passionate Business Data Analytics graduate with hands-on knowledge of SQL, Advanced Excel, Power BI, Tableau, and Python. Skilled in data analysis, dashboard creation, and visualization through academic projects. Eager to apply analytical skills to solve real-world business problems.

PROJECTS

Dashboards for Customer Churn Analysis (Business Analysis Project)

- Analysed customer and subscription data to identify key drivers of customer churn; developed an interactive Power BI dashboard using cleaned and transformed Excel data, **supported data-driven customer retention strategies**.
- Designed business KPIs, including Churn Rate, Retention Rate, Revenue Loss, and Customer Lifetime Value (CLV), to provide stakeholders with a comprehensive view of customer retention performance and business health.
- Evaluated churn trends across contract type, monthly charges, and payment methods through interactive visualizations; identified high-risk customer segments to support targeted retention initiatives and strategic business decisions.

TATA GenAI Powered Data Analytics Job Simulation (Forage)

- Analysed financial data to identify delinquency risk patterns; performed EDA and data cleaning using Excel; improved data quality for accurate analysis.
- Evaluated customer repayment behaviour using credit utilization, credit score, and missed payments; identified high-risk customers to support collection strategies.
- **Developed a delinquency prediction** framework using analytical insights; supported data-driven decision-making for effective debt collection.

Deloitte Data Analytics Job Simulation (Forage)

- Analysed machine telemetry data from four manufacturing facilities; developed interactive Tableau dashboards using calculated fields and filters; identified downtime trends and equipment performance issues.
- Evaluated factory and machine-level downtime, visualized key metrics through bar charts and interactive filters; highlighted high-downtime equipment to support operational improvements.
- Assessed employee equality scores using Excel formulas and data analysis; generated actionable insights to support fair and data-driven business decisions.

EDUCATION

Bachelor of Commerce in Business Data Analytics

Vivekananda Degree College, Rajajinagar, Bangalore

CGPA: 8.63 | 2023 - 2026

Intermediate (GEBA in Commerce)

SHVNM Government Girls Pre University College

Percentage: 75% | 2023

SKILLS

Languages: Python for Data Analytics

Databases: MySQL

Visualization Tools: Power BI, Tableau

Spreadsheet Tools: Microsoft Excel (Advanced), Power Query (Pivot tables, Data cleaning, Charts)

Interests: Business Analytics, Model Building, Generative AI

CERTIFICATIONS

Advance Excel Certification

Excel Charts and Graphs: Master Class

Mastering SQL with MySQL: Basics to Advanced
